Mr. Erin Craft
Anew Kind of Clean

AIR QUALITY CONSULTANTS, LLC

Re: Letter of Recommendation

Dear Mr. Craft:

Air Quality Consultants, LLC (AQC) is pleased to provide this letter of recommendation for Anew Kind of Clean. As you are already aware, AQC is an environmental consulting company that specializes in indoor air quality assessments and provides remediation plans to remediation contractors for cleanup of contamination (mold, meth, particulates, asbestos, lead, particulates, etc).

AQC has worked with Anew Kind of Clean on several mold remediation projects (commercial and residential). AQC provided a remediation plan and pre and post remediation inspection and sampling services on each of these projects. Anew Kind of Clean was contracted by the Client and performed the recommended remediation on these projects.

Anew Kind of Clean provided exceptional service to the building owners, insurance companies, and AQC. From a technical perspective, the remediation conducted was excellent, every detail of the remediation plan was executed as recommended, and the site was exceptionally clean at completion of the remediation. Anew Kind of Clean also provided a high level of communication and project management to all parties involved that allowed the projects to run seamlessly.

AQC highly recommends Anew Kind of Clean for any type of environmental cleanup. AQC makes this recommendation because of their high level of professionalism and competence in addition to the extensive training and high level of communication, project management and level of detail that Anew Kind of Clean provides.

AQC appreciates the opportunity to provide a letter of recommendation. Please feel free to contact us at 517-490-1304 or at rostoni@miaqc.com with any follow up questions related to the recommendation.

Sincerely,
Air Quality Consultants, LLC
